

# FLOW MEASUREMENT

Flow measurement systems for all liquids, gases and steam. Suitable for industrial process control, consumption and energy management applications.

- o Paddle Wheel Flowmeters
- o Oval Gear Flowmeters
- o Turbine Flowmeters
- o Electromagnetic Flowmeters
- o Vortex Flowmeters
- o Ultrasonic Flowmeters
- o Coriolis Flowmeters
- o Thermal Mass And Calorimetric Flowmeters
- o Surface Acoustic Wave (saw) Flowmeters
- o Mechatronic Flowmeters
- o Variable Area (rotameter) Flowmeters
- o Positive Displacement (mechanical) Flowmeters
- o Displays, Recorders, Controllers And Computation Units For Flow Metering Applications
